Summary

A results-driven Fullstack Developer with over 5 years of experience. Proven expertise in API development, database configuration, and frontend-backend integrations. Adept at implementing microservices architectures and streamlining application builds using cutting-edge DevOps practices.

Education

Bachelor of Science
Atma Jaya University, Yogyakarta
Completed in 2017

Professional Experience

Java Developer - Go International Service, Chatswood, NSW
July 2023 - August 2023

- Developed and maintained Java applications, aligning with industry standards.
- Collaborated with cross-functional teams to define and document requirements.
- Designed and managed MySQL databases with an emphasis on data integrity, crucial for real-time betting data.
- Engineered and integrated REST APIs for secure and efficient data interconnection.
- Played a key role in software system design, prioritizing scalability, reliability, and security.
- Integrated front-end applications built with Next.js with Java backend services.

Full Stack Developer - KEB Hana Bank Indonesia, Jakarta, Indonesia

January 2020 - May 2023

- Oversaw the development and maintenance of the corporate website, optimizing user experience.
- Designed, developed, and maintained Hana Mobile Apps, adhering to industry standards.
- Led the development and upkeep of Hana Pioneer software component.
- Pioneered the Microservices architecture for a new internal project, utilizing cutting-edge technologies for scalability and flexibility.
- Directed the migration of projects to Next.js, emphasizing performance, SEO, and server-side rendering.
- Developed robust backend services in Java, integrating with front-end applications through RESTful APIs.
- Collaborated with the UI/UX team to integrate designs into the Next.js framework, ensuring consistent user experience across devices.
- Established and maintained CI/CD pipelines, promoting efficient releases and application stability.

Business Analyst - KEB Hana Bank Indonesia, Jakarta, Indonesia

July 2019 - December 2020

- Worked closely with business users to gather and document requirements.
- Analyzed existing processes, identifying areas for improvement and automation.
- Collaborated on the design of the future-state process, aligning with business needs.
- Prepared detailed User Requirement Specifications and Functional Specification Documents.
- Contributed to the development and maintenance of Hana Pioneer, ensuring efficiency and reliability.

Android Developer - Intikom Berlian Mustika, Jakarta, Indonesia

July 2018 - July 2019 (Outsourced to KEB Hana Bank Indonesia)

- Developed Hana Recruitment applications for iOS and Android platforms.

Android Developer - XYBase Inc., Jakarta, Indonesia

June 2017 - July 2018

- Designed and maintained hybrid applications tailored for airport environments.
